

geoconvention

Calgary • Canada • May 7-11

2018

GeoConvention is a unique experience to learn about the latest technologies, workflows and advancements in Geosciences. Beyond the traditional technical sessions covering all things geology, geophysics and petrophysics, 2018 will take a holistic approach with our program and offer diverse content highlighting many areas of our energy industry:

- ▶ Gas Migration & Well Abandonment
- ▶ Greenhouse Gas Reduction & Carbon Capture
- ▶ Hydrogeology
- ▶ Pipelines, Transportation and Market Access
- ▶ Financial Markets and Business Analysis
- ▶ Venture Capital
- ▶ Innovation and Emerging Technologies
- ▶ Alternative Energy Sources

All undergraduate/ graduate students and professors are welcome to be a part of the innovation, technologies and research in the industry.

GeoConvention provides an avenue to grow your personal network and have your questions answered from geoscience professionals and academia.

Registration is free for students who volunteer 8 hours and **Student travel assistance** is available to help with the cost of travel, hotels and food!

CALL FOR ABSTRACTS: The 2018 Call for Abstracts is **OPEN!** A great opportunity to share your work with thousands who attend and get your name out there in the geoscience community. Check out www.geoconvention.com for more details. **DEADLINE to submit your abstract is DECEMBER 8, 2017.**
